## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-15 and 17-20 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Newgard et al (US 4,874,377).

For convenience, the examiner hereby directs applicant's attention to the following noteworthy passages in the patent.

Column 1, lines 28-30, and 33-35;

Column 6, lines 29, 44 (male luer connector), 56-57, and 67;

Column 8, lines 25-32;

Column 9, lines 22, and 35.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 16 is rejected under 35 U.S.C. 103(a) as being unpatentable over Newgard et al in view of Jepson et al (US 5,957,898).

Newgard teaches all the claimed subject matter including the use of the device with many elongate instruments (col. 1, lines 33-35); but does not explicitly teach use with a guidewire. Jepson teaches a similar device wherein a guidewire is taught to be used in conjunction with it (col. 12, line 59). In view of the teaching in col. 1 of Newgard, it would have been obvious to one of ordinary skill in the art that the device of Newgard would be effective in preventing leakage during usage of a guidewire in the well-known manner taught by Jepson.
